

Call for Papers

~ Limited to overseas participants ~

nano tech 2010: International Nanotechnology Exhibition & Conference is the largest nanotechnology event in the world. The event will highlight cutting-edge advances in nanotechnology and related products from the global market.

Recently, the need to meet global energy transformation and solve environmental problems has been demanded on a global scale. Research and development as well as product manufacturing are aiming to address various environmental problems. Advanced nanotechnology plays a leading role in this field, contributing to the development of solar cells, fuel cells, separation membrane, and nanocatalysts.

With a new realization on present fundamental nanotechnology, under the theme of "Green Nanotechnology", we see the development of devices such as solar cells or fuel cells, as well as of applied products for environmental purification such as catalysts. In addition, we understand the importance of these developments to face the future environmental challenges.

nano tech 2010 is pleased to invite interested overseas participants to submit abstracts for Poster presentations. We especially welcome presentations or programs related to Green Nanotechnology.

The review to accept a presentation will be made by nano tech executive committee members.

- Topics : nanotechnology or nano materials to meet global energy transformation and solve environmental problems
- Submission: Abstracts (up to 1 page) should be sent to Secretariat of nano tech executive committee by Email (to:nanoposter@ics-inc.co.jp). Abstracts should include your name, affiliation and contact information (including e-mail address).
- Deadline for abstract submission: Friday, December 4th, 2009
- Acceptance of papers: Authors will be notified of acceptance by 25th December 2009.
- Posters: Posters will be presented in the exhibition venue of nano tech 2010.
- Condition: Participants should able to attend the poster session to explain their work. The entire expense (ex: airfare, accommodation fee, etc). has to be assumed by the participants

<Outline of nano tech 2010 International Nanotechnology Exhibition & Conference>

Date: February 17(Wed.) - 19(Fri.), 2010 10:00 - 17:00

Venue: East Exhibition Hall 4,5,6 & Conference Tower, Tokyo Big Sight, Japan

Expected Number of Visitors: 50,000

Size of Exhibition: 500 Exhibitors, 800 Booths

Attendance of nano tech 2009: 603 Exhibitors (395 from Japan, 208 from 20 foreign countries), 909 booths
